BlueHouse Telecom

School installation brief

Use this worksheet to give bidders the same quantities, work windows, and acceptance requirements.

Completed project at a San Diego charter school Read the case study

BlueHouse delivered 60 access-controlled doors, 50 security cameras, and VoIP lines with intercom.

Your proposed scope

Enter estimates. Write “TBD” for quantities or decisions that still need a survey.

Site or city and state

Target installation window

Controlled doors

Security cameras

VoIP lines

Intercom devices

What should each proposal include?

Door access Which existing hardware or credentials should bidders evaluate for reuse?

Security cameras What recording period, retrieval test, and staff training should bidders include?

Voice and intercom How many numbers need to transfer, and who will accept the intercom handoff?

Compare one-time and recurring costs

Ask for hardware and labor by service, licensing and support fees, and any exclusions.
